INTRODUCTION

The 1987-88 *ARL Statistics* presents data from the 119 U.S. and Canadian libraries that were members of the Association of Research Libraries during the 1987-88 fiscal year. The ARL membership consists of 107 university libraries and 12 public or private, independent research libraries. The University of Illinois at Chicago joined ARL during the fiscal year, and its data are reported here for the first time.

The 1987-88 statistics paint a disheartening picture of research libraries paying more for materials and buying less. Since 1985-86 ARL has been collecting data that allow calculation of rough price indexes for monographs and serials, to which 91% of the materials budget is devoted in university libraries. In the university libraries that have reported on monographs and purchased serials over the last three years, the median unit prices of both monographs and serials increased 12% from fiscal year 1987 to 1988. For the three-year period 1986 to 1988, the statistics indicate the following percent changes:

	Monographs	Serials
Median unit prices	+21%	+32%
Total expenditures	+ 2%	+30%
Number purchased	-15%	0%

Because of price increases, university libraries paid about one-third more in 1988 for the same number of serial subscriptions they had in 1986, and they bought 15% fewer monographs. It seems clear that ARL libraries are trying to protect their serials at the expense of monographs.

In order to provide a longer view of changes indicated by the data, an analysis was done of the statistics of the 93 university libraries that have been members of ARL since 1978-79 and that lacked no more than one data value for the ten years from 1978-79 through 1987-88. Highlights of the analysis are described in the following sections.

Expenditures: Over the ten-year period the various categories of expenditures increased as follows:

	Overall Increases	Annual Rates
Monographs, microforms, and other non-serial materials	91%	7%
Serials	143%	10%
Salaries and wages	87%	7%
Other operating expenses, including binding	162%	11%
Total expenditures	105%	8%

For some categories the calculated compound annual rates above (based on the differences between 1988 and 1979 data) differ in some years from the actual yearly increases. For example, as indicated earlier, expenditures for monographs and other non-serials have increased hardly at all since 1986. In respect to serials, increases during the years 1982-86 were under 10%, but since 1986 the increases have been 17% and 12%. After years of annual increases in the 9-16% range, the 1988 increase in other operating expenditures was inexplicably lower.

As a result of differing rates of increase, the ratios of the major expenditure categories to total expenditures have been changing steadily. The table below displays the ratios 25 years ago, 10 years ago, and in 1988, together with predicted ratios in the year 2000 if 1979-88 trends continue:

	1964	1979	1988	2000
Salaries and wages	59%	57%	52%	45%
Library materials	31%	31%	33%	35%
Other operating expenses	10%	12%	15%	20%

By the end of the century, if recent trends continue, serials will comprise two-thirds of materials expenditures. Almost twice as much will be spent on other operating expenditures (for example, automation and equipment) as on monographs, microforms, and other non-serial materials. Ten years ago, 75% of ARL libraries spent more--sometimes considerably more--on non-serial materials then on other operating expenses. 1988 is the first year in which a majority of libraries (56%) are spending more on other operating than on monographs, microforms, etc. ARL is changing from the "classic" 60/30/10 model for personnel/materials/other, to a 45/35/20 model. More and more, 15% of the budget that used to go to personnel is going to materials and other operating expenditures.

Collections: Because of rising prices ARL libraries are less well off in building their collections than they were ten years ago. They are adding only about 96% as many volumes as they added in 1979: some 350,000 volumes fewer in 1988 than in 1979 for the 93 university libraries in the analysis. The number of current serials is 13% higher than ten years ago, but this 13% increase in serials has been paid for with a 143% increase in the serials bill.

Personnel: Total staff in the 93 libraries increased by 10%, or 2,717 FTE's. 27% of the increase was professional staff, 25% nonprofessionals, and 48% student assistants. About two-thirds of the libraries had more professionals, more student assistants, and more total staff in 1988 than in 1979. 58% had more nonprofessionals.

The preceding analysis is based on aggregate data. Those using the *ARL Statistics* to compare individual libraries should consult the symbols indicated in the "ARL Library Data Tables" and in the "Footnotes". Although definitions used in the *Statistics* aim at achieving consistency, variant reporting practices do exist among ARL libraries. To aid comparability, expenditures of Canadian libraries are expressed in U.S. dollars in the *ARL Statistics*; the exchange rate used for 1987-88 is 1.2826 Canadian dollars to one U.S. dollar.[1]

The rank order tables presented in this publication are based on quantitative data supplied by ARL member libraries. They are not indicative of qualitative factors and, therefore, should not be used as measures of library quality. In comparing any individual library to ARL medians or to other ARL members, one must be careful to make such comparisons within the context of differing institutional and local goals and characteristics.

ANALYSIS OF SELECTED VARIABLES OF UNIVERSITY LIBRARIES

The percentages and ratios below are intended to summarize the basic data in the ARL Library Data Tables. The high, median, and low figures indicate the range as well as the midpoint for ARL's 107 university library members.

Category	High	Median	Low
1. Professional Staff as percent of Total Staff	38	25	18
2. Nonprofessional Staff as percent of Total Staff	73	51	14
3. Student Assistant Staff as percent of Total Staff	59	22	3
4. Ratio of Professional Staff to Non-professional Staff (excluding student assistants)	1.9:1	0.5:1	0.3:1
5. Ratio of Items Loaned to Items Borrowed	14.9:1	2.1:1	0.6:1
6. Serials Expenditures as percent of Materials Expenditures	76	59	33
7. Materials Expenditures as percent of Total Operating Expenditures	47	34	24
8. Contract Binding as percent of Total Operating Expenditures	3.3	1.5	0.6
9. Salary and Wage Expenditures as percent of Total Operating Expenditures	67	52	40
10. Other Operating Expenditures as percent of Total Operating Expenditures	27	13	4
11. Unit cost of monographs (per volume)	61.46	35.72	14.84
12. Unit cost of serials (per title)	211.08	115.05	63.86

Median figures are useful indicators when there is wide dispersion within a distribution. Because the mean represents a "balance point," a few very high or low scores may sometimes pull the mean away from the actual point at which values cluster. Medians, on the other hand, are a measure of central tendency, focusing on the midpoint in a distribution, and are thus preferable for describing ARL libraries.

SUMMARY OF RANK ORDER TABLES FOR UNIVERSITY LIBRARIES

The table below presents the rank for each university library in each of the seventeen categories for which rank order tables are prepared. As a further indication of the relative position of each institution, note that, in the individual rank order tables on the following pages, "group codes" are used. This is done because, in a number of cases, there is a relatively insignificant difference between two institutions which are nevertheless given two different rankings. The "coarser" ranking provided by clustering institutions into groups (based upon ranges) more realistically describes a library's relative standing.

The table numbers in the chart below refer to the following categories:

Table 1 - Volumes in Library (107)
Table 2 - Volumes Added (Gross) (107)
Table 3 - Current Serials (Total) (107)
Table 4 - Microform Holdings (Total) (107)
Table 5 - Materials Expenditures (107)
Table 6 - Salaries & Wages Expenditures (107)
Table 7 - Other Operating Expenditures (107)
Table 8 - Total Operating Expenditures (107)
Table 9 - Monographs Purchased (Volumes) (78)
Table 10 - Expenditures For Monographs (104)
Table 11 - Serials Purchased (Titles) (69)
Table 12 - Expenditures for Serials (106)
Table 13 - Total Items Loaned (107)
Table 14 - Total Items Borrowed (107)
Table 15 - Professional Staff (FTE) (107)
Table 16 - Nonprofessional Staff (FTE) (107)
Table 17 - Total Staff (FTE) (107)

RANK ORDER TABLES OF UNIVERSITY LIBRARIES

RANK ORDER TABLE 1: VOLUMES IN LIBRARY

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

Group Ranges (in thousands) are:

1- 9,000 and over
2- 8,000-8,999
3- 7,000-7,999
4- 6,000-6,999
5- 5,000-5,999
6- 4,000-4,999
7- 3,000-3,999
8- 2,000-2,999
9- 1,000-1,999

RANK ORDER TABLE 4: MICROFORM HOLDINGS

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

Group Ranges (in thousands) are:

1- 4,000 and over
2- 3,500-3,999
3- 3,000-3,499
4- 2,500-2,999
5- 2,000-2,499
6- 1,500-1,999
7- 1,000-1,499
8- under 1,000

RANK ORDER TABLE 7: OTHER OPERATING EXPENDITURES

The grouping of institutions below is done because, in a number of cases, there is a relatively insignificant difference between two institutions, which are nevertheless given two different rankings. In order to provide a "coarser" ranking, the institutions are thus clustered into groups according to the ranges specified here.

Group Ranges (in thousands) are:

1- 4,000 and over
2- 3,500-3,999

6- 1,500-1,999
6- 1,000-1,499
7- 500-999
8- under 500

ARL STATISTICS, 1987-88

Instructions for Completing the Questionnaire

1. Definitions of the statistical categories used in this questionnaire can be found in *American National Standard for Library and Information Sciences and Related Publishing Practices - Library Statistics*. Z39.7-1983. (New York, American National Standards Institute, 1983.)

2. The questionnaire assumes a fiscal year ending June 30, 1988. If your fiscal year is different, please provide a footnote on p. 4 of the questionnaire.

3. **Please do not use decimals.** All figures should be rounded to the nearest whole number.

4. **Please do not leave any lines blank.** If the appropriate answer is zero or none, use **0**. If an exact figure is unavailable, use **U/A**. If a question is not applicable to your library, use **N/A**.

5. In a university which includes both main and branch campuses, an effort should be made to report figures for the main campus only. (The U.S. National Center for Education Statistics in its Integrated Postsecondary Education Data System (IPEDS) survey described a **branch campus** as one "located in a community different from that of its parent institution ... beyond a reasonable commuting distance from the main campus ... The educational activities at the location must be organized on a relatively permanent basis ... and include course offerings for one or more complete college-level programs of at least one full year.") If figures for libraries located on branch campuses are reported, please provide an explanatory footnote on p. 4 of the questionnaire.

6. A **branch library** is defined as an auxiliary library service outlet with quarters separate from the central library of a system, which has a basic collection of books and other materials, a regular staffing level, and an established schedule. A branch library is administered either by the central library or (as in the case of some law and medical libraries) through the administrative structure of other units within the university. Departmental study/reading rooms are not included.

7. **Questions 1-6. Collections.** Use the ANSI Z39.7-1983 definition for **volume** as follows:

> a physical unit of any printed, typewritten, handwritten, mimeographed, or processed work, contained in one binding or portfolio, hardbound or paperbound, which has been cataloged, classified, and made ready for use.

Include duplicates and bound volumes of periodicals. Exclude microforms, maps, nonprint materials, and uncataloged items. Exclude government document volumes unless they are cataloged, classified, and shelved as part of the general collection. If any of these items cannot be excluded, please provide an explanatory footnote on p. 4 of the questionnaire. For purposes of this questionnaire, unclassified bound serials that are arranged in alphabetical order are considered classified.

8. **Question 2.** Include only volumes cataloged, classified, and made ready for use.

9. **Question 6.** Report number of volumes purchased. Include all volumes for which an expenditure was made during 1987-88, including volumes paid for in advance but not received during the fiscal year. Include monographs in series and continuations. If only number of titles purchased can be reported, please report the data and provide an explanatory footnote on p. 4 of the questionnaire. **Note:** This question is concerned with volumes purchased rather than volumes received or

cataloged. Question 15 requests the expenditure for the volumes counted here.

10. **Questions 7-9. Serials**. Include duplicate subscriptions and only those government document serials that are cataloged, classified, and shelved as part of the general collection; do not include government documents serials that are housed in a separate government documents collection. Exclude monographic and publishers' series. A **serial** is

> a publication issued in successive parts, usually at regular intervals, and as a rule, intended to be continued indefinitely. Serials include periodicals, newspapers, annuals (reports, yearbooks, etc.), memoirs, proceedings, and transactions of societies.

11. **Question 8.** If the number of nonpurchased serials is not available, report only the total number of current serials received on line 9, and report **U/A** for lines 7 and 8.

12. **Question 10. Microforms**. Include number of reels of microfilm, number of microcards, and number of microprint and microfiche sheets. Exclude government document microforms.

13. **Questions 11-14. Personnel.** Report the number of staff in filled positions, or positions which are only temporarily vacant. Include cost recovery positions and staff hired for special projects and grants, but provide an explanatory footnote indicating the number of such staff. If such staff cannot be included, provide a footnote on p. 4 of the questionnaire. The number of FTE staff should be determined on the basis of the length of the work week in the reporting library. Round figures to the nearest whole numbers.

14. **Question 11**. Since the criteria for determining professional status vary among libraries, there is no attempt to define the term "professional." Each library should report those staff members it considers professional, including, when appropriate, staff who are not librarians in the strict sense of the term, such as computer experts, systems analysts, budget officers, etc.

15. **Questions 15-26. Expenditures**. Report all expenditures of funds that come to the library from the regular institutional budget and from other sources, such as research grants, special projects, gifts and endowments, and fees for service. Canadian libraries should report expenditures in both Canadian and U.S. dollars. To determine figures in U.S. dollars, divide Canadian dollar amounts by 1.2826, the average monthly noon exchange rate published in the Bank of Canada *Review* for the period July 1987-June 1988.

16. **Question 15**. Include here expenditures for volumes reported on line 6.

17. **Question 16**. Exclude monographic and publishers' series.

18. **Question 17**. Include all materials except monographs and current serials, e.g. microforms, backfiles of serials, charts and maps, audiovisual materials, manuscripts, electronic media, etc. If expenditures for these materials are included in lines 15 and/or 16 and cannot be disaggregated, please report U/A and provide a footnote on page 4.

19. **Question 18**. Include any other materials funds expenditures not included in questions 15-17, e.g., expenditures for bibliographic utilities, literature searching, security devices, memberships for the purposes of publications, etc. Please list categories, with amounts, in a footnote on p. 4 of the questionnaire. Note: If your library does not use materials funds for non-materials expenditures, **please report 0, not U/A.** (Many libraries include expenditures for these items in Other Operating Expenditures, line 25.)

20. **Question 20**. Include only contract expenditures. If all binding is done in-house, state this fact and give in-house expenditures in a footnote on p. 4 of the questionnaire; do not include personnel expenditures.

21. **Questions 21-24**. Exclude fringe benefits.

22. **Questions 23-24**. Report 100% of student wages. Include federal and local funds for work study students, regardless of budgetary source of funds.

23. **Question 25**. Exclude expenditures for buildings, maintenance, and fringe benefits.

24. **Questions 27-28**. Include both original materials and photocopies in lieu of originals.

25. **Questions 29-30. Ph.D. Degrees**. Please note that only the number of Ph.D. degrees are to be counted. Statistics on all other advanced degrees (e.g., D.Ed., D.P.A., M.D., J.D.) are not included in this survey. If you are unable to provide a figure for Ph.D.s only, please note this in a footnote on p. 4 of the questionnaire.

26. **Question 30**. For the purposes of this report, Ph.D. fields are defined as the specific discipline specialties formerly enumerated in the form used by the U.S. Department of Education entitled, "Integrated Postsecondary Education Data System Survey, Postsecondary Completions," designated as ED (CS) Form G50-14P-C. Although the IPEDS form requests figures for all doctoral degrees, only fields in which Ph.D.s are awarded should be reported on the ARL questionnaire. Any exceptions should be noted in a footnote on p. 4 of the questionnaire.

27. **Questions 31-34. Enrollment.** U.S. libraries should use the 1987-88 enrollment figures reported to the Department of Education on the form entitled "Integrated Postsecondary Education Data System, Fall Enrollment . . . 1987," designated as ED (CS) Form G50-14P-EF. The line and column numbers on the IPEDS form for each category are noted on the questionnaire. Please check these figures against the enrollment figures reported to ARL in 1987 to ensure consistency and accuracy. **Note**: In the past, the number of part-time students reported was FTE; the number now reported to IPEDS is a head count of part-time students.

28. **Question 35. Faculty**. Instructional faculty are defined as those members of the Instructional/Research staff who are employed on a full-time basis and whose major regular assignment is instruction, including those with released time for research. Please be sure number reported is equivalent to the number reported for 1986-87.

29. **Footnotes**. Reporting libraries are urged to record in the footnote section any information that would clarify the figures submitted, e.g., the inclusion of branch campus libraries. Explanatory footnotes will be included with the published statistics. Please make an effort to word your footnotes in a manner consistent with notes appearing in the published report, so that the ARL Office can interpret your footnotes correctly. For your convenience, a copy of your footnotes from the 1986-87 *ARL Statistics* is included in the questionnaire. Please update these notes, delete them, or indicate that they remain valid. (Please note that the number in parentheses refers to the appropriate column on the Library Data Tables in the published *Statistics*, not to a line number on the questionnaire.)

30. After the questionnaire has been completed, please compare the figures with those submitted last year. On occasion, an error will be detected because of an unusual difference between numbers submitted this year and those for the preceding year. If an unusual change has occurred, please provide an explanatory footnote on p. 4 of the questionnaire.

31. Before returning the questionnaire, **please check all math.** Many follow-up telephone calls can be avoided if math errors are corrected before the questionnaire is submitted.

32. Return one copy of the questionnaire to the ARL Office by **October 7, 1988**. If there are any questions about the procedure to be followed in completing these questionnaires, contact the ARL Office. Please be sure the library director has signed the questionnaire before it is returned to the ARL Office.
